Alcove

*exclusive fabrics for pod
and workstation makers*

e-catalogue · 2026

nine designs · made to your brief

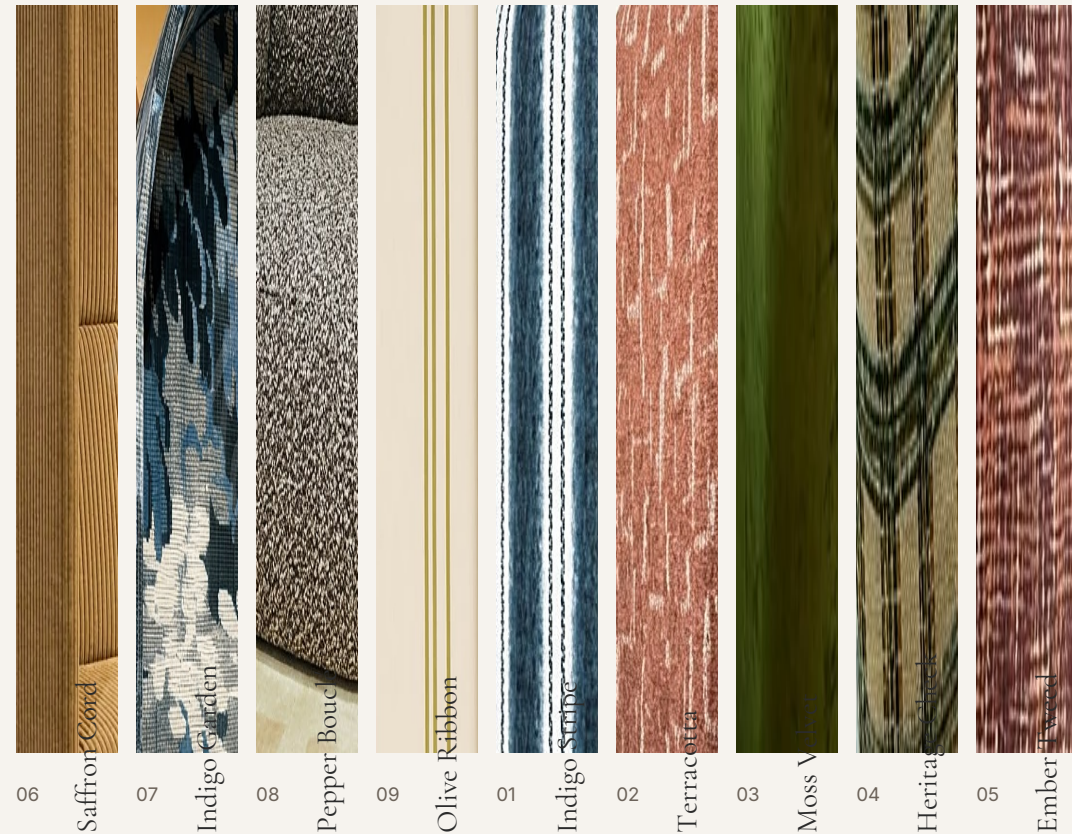

about alcove

Quiet, *by design.*

Alcove is an exclusive fabric collection from Response Fabrics, created for companies that make and sell work pods, booths and workstations.

Every Alcove design is developed to your brief, in your colours, and woven only for your brand. Once a design is yours, it is never made for anyone else.

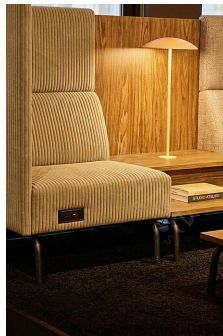

The nine designs in this catalogue show what is possible. Each can be adapted, recoloured or reimagined, or we can begin with a blank page.

the designs

Nine starting points.

Each one can be made yours.

06

Saffron Cord

07

Indigo Garden

08

09

Olive Ribbon

01

Indigo Stripe

02

Terracotta

03

Moss Velvet

04

Heritage Check

05

Ember Tweed

alcove · custom design 06

Saffron Cord

A deep rib in warm saffron.

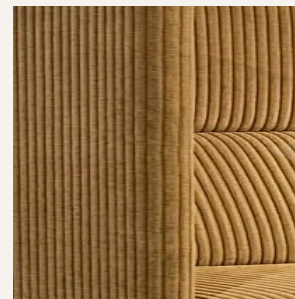

Light catches every ridge and falls away between them, so the fabric moves as you walk past it. On a tall booth, that depth does what a flat weave never can.

character

Deep rib · warm · tailored

suited to

High-back booths, banquettes, workstation screens

fabric detail

Available to adapt in your brand colours, scale and texture. Composition, weight and performance data shared on request.

alcove · custom design 07

Indigo Garden

A painted garden, woven in indigo.

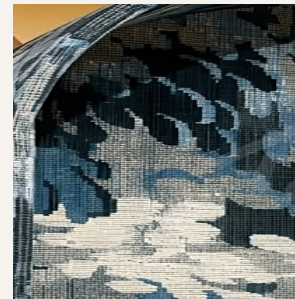

A painterly jacquard in indigo, slate and ivory, drawn at a scale most mills avoid. Large enough, one booth stops being furniture and becomes a room within the room.

character

Painterly · large scale · layered

suited to

Arches, booth shells, feature panels

fabric detail

Available to adapt in your brand colours, scale and texture. Composition, weight and performance data shared on request.

alcove · custom design 08

Pepper Bouclé

Salt, pepper and softness.

Dense, flecked and soft to the hand. Set against a plain shell, the eye goes straight to the seat: the shell frames it, the texture holds it.

character

Dense · flecked · soft

suited to

Lounge seats, tub chairs, cushions

fabric detail

Available to adapt in your brand colours, scale and texture. Composition, weight and performance data shared on request.

alcove · custom design 09

Olive Ribbon

Fine olive lines on ivory.

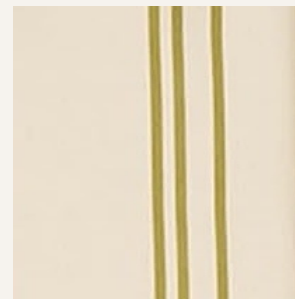

A woven stripe runs straight. These applied ribbons follow the curve of the seat, so the line stays true wherever the form turns.

character

Linear · precise · graphic

suited to

Sculptural seats, screens, headboards

fabric detail

Available to adapt in your brand colours, scale and texture. Composition, weight and performance data shared on request.

alcove · custom design 01

Indigo Stripe

A bold stripe with a tailored edge.

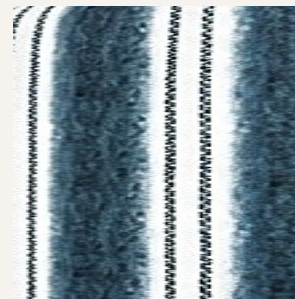

Deep indigo bands broken by crisp ivory and a fine black chain line. Graphic from a distance and richly textured up close, it gives a pod shell or booth back an unmistakable signature.

character

Graphic · tailored · confident

suited to

Pod exteriors, booth backs, workstation screens

fabric detail

Available to adapt in your brand colours, scale and texture. Composition, weight and performance data shared on request.

alcove · custom design 02

Terracotta

Warm clay, softly marked.

A sun-baked terracotta ground with broken ivory marks that read like hand-drawn lines. It brings warmth and calm to busy office floors while hiding everyday wear.

character

Warm · earthy · calm

suited to

Pod exteriors and interiors, acoustic panels, screens

fabric detail

Available to adapt in your brand colours, scale and texture. Composition, weight and performance data shared on request.

alcove · custom design 03

Moss Velvet

Deep green with a quiet sheen.

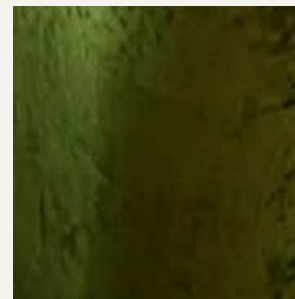

A plush moss velvet that catches the light as you move past it. Soft to the touch and generous in colour, it turns booth seating into somewhere people want to stay.

character

Plush · rich · inviting

suited to

Booth seating, lounge pods, high-back sofas

fabric detail

Available to adapt in your brand colours, scale and texture. Composition, weight and performance data shared on request.

alcove · custom design 04

Heritage Check

A classic check, woven for work.

Moss, ochre and sand interlace in a textured check with a hand-loomed feel. Paired with Moss Velvet, it gives open-plan booths a warm, residential character.

character

Heritage · textured · relaxed

suited to

Booth exteriors, divider panels, focus zones

fabric detail

Available to adapt in your brand colours, scale and texture. Composition, weight and performance data shared on request.

alcove · custom design 05

Ember Tweed

Rust, wine and ivory, woven together.

A textured tweed in layered rust, deep wine and ivory flecks. Its depth suits sculptural pods, where the fabric follows every curve and becomes the design.

character

Sculptural · layered · striking

suited to

Sculptural pods, statement booths, reception seating

fabric detail

Available to adapt in your brand colours, scale and texture. Composition, weight and performance data shared on request.

how it works

From your brief to your fabric.

01

Share your brief

Tell us about your pods or workstations, your brand colours, the look you want and the quantities you need.

02

We design

Our team develops the design around your brief, starting from an Alcove design or from a blank page.

03

Sample and approve

You review physical samples and request changes until the fabric is exactly right.

04

Woven for you

Your fabric is woven to order, and the design stays exclusive to your brand.

response fabrics

Now taking *briefs.*

Share your brief, brand colours and quantities, and we'll design a fabric that belongs only to you.
